Purpose and boundary

Prepare a full accessibility conformance evidence table using an authorized customer-supplied template and selected criteria.

Bind the actual product version and licensed template/version to the complete customer-declared selected criterion set. Map every criterion to actual tests and approved Supports, Partially supports, Does not support, Not applicable or Not evaluated wording. Reject support claims contradicted by failures, missing coverage, unsupported applicability and mixed versions. Export complete preparation tables and text without claiming certification.

This browser preparation retains original customer evidence and selected source-approved criteria. Actual manual tests, authorization, delivery, signatures, employment status and legal applicability remain responsible human decisions. PDF checks cover only supported structural indicators, not semantic accessibility or conformance. No external scan, filing, remote AI or provider is called. Exact sources stay in this browser unless explicitly saved through paid private cloud saving.
