Purpose and boundary

Compare actual advertisement text and exact pay ranges with approved jurisdiction-specific posting requirements.

Read the actual UTF-8 advertisement file and compare its exact quoted content with approved rule versions and effective dates. Parse a supported closed USD pay range and unit, preserve exact arithmetic, flag open/reversed/conflicting ranges and missing selected benefits, other compensation or job-description text. Compare stated good-faith basis, location and public versions. No legal applicability, currency conversion or salary fairness is inferred.

This browser preparation retains original customer evidence and selected source-approved criteria. Actual manual tests, authorization, delivery, signatures, employment status and legal applicability remain responsible human decisions. PDF checks cover only supported structural indicators, not semantic accessibility or conformance. No external scan, filing, remote AI or provider is called. Exact sources stay in this browser unless explicitly saved through paid private cloud saving.
