

COMPLIANCE WORKING RECORD

AI risk classification workpaper

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	AI risk classification workpaper
Document reference	FICTIONAL-AI-GOVERNANCE-1
Jurisdiction	Customer-selected US preparation
Version	1
Status	Named AI governance workpaper prepared
Prepared by	Fictional responsible AI reviewer
Prepared on	2026-10-09T18:00:00Z
Rule pack	2026-10-09.ai-governance-workpaper.1
Generated	October 9, 2026

Purpose and boundary

Prepare separate AI risk-classification workpapers for each approved jurisdiction, framework, role and intended use.

Route source-supported intended use and factual criteria through explicit All or Any groups. Do not combine classification schemes or versions. Trace matched categories, exclusions, conflicting categories and accountable classification hypotheses. No working match becomes a legal classification.

This browser preparation retains exact system facts, customer-approved jurisdictions and operative rules, original evidence and accountable decisions. It does not issue a legal classification, prove oversight or accessibility, establish copyright ownership, certify documentation or publish a notice. Imported non-US instruments require explicit approval. No remote AI or provider is called. Original files remain browser-local unless explicitly saved through paid private cloud saving.

Approved scope and AI governance method

Fictional exercise only. One exact system/version with actual selected task rows, imported approved rules and original sources. Replace every fact before use.

Scope approval. FICTIONAL-SCOPE-1

Approved method. Fictional approved AI governance procedure 1. Source. f1. Locator. /methodVersion. Approver. Fictional authorized method approver. Approval date. 2026-01-02T12:00:00Z

Population statement. Declared complete population. Customer-declared system count. 1

Jurisdiction-specific classification routing workpaper system inputs

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

Source	Provision	Date	Link
European Commission: Draft guidelines on classification of high-risk AI systems	The May 19, 2026 publication is expressly a draft interpretation of Article 6. It distinguishes product /safety-component and listed-use routes and factual exclusions. This source supports a transparent routing structure, not automatic applicability. The customer supplies the approved instrument, classification scheme, role, actual category and version.. Route source-supported intended use and factual criteria through explicit All or Any groups. Do not combine classification schemes or versions. Trace matched categories, exclusions, conflicting categories and accountable classification hypotheses. No working match becomes a legal classification. Actual legal applicability, source completeness and real-world effectiveness remain separately approved decisions.
