

COMPLIANCE WORKING RECORD

Data import acceptance report

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Data import acceptance report
Document reference	39-data-import-acceptance-report
Jurisdiction	United States
Version	2026-10-08.dataset-utility.1
Status	Import checks unresolved
Prepared by	Customer prepared
Prepared on	October 8, 2026
Generated	October 8, 2026

Purpose and boundary

Prepare a source-bound report of schema checks, row-count checks and declared external checks for an intended import.

Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.

Method and exact sources

Method revision 2026-10-08.dataset-utility.1.

Run actual schema and row-count checks independently. Preserve external check states as customer declarations. Any failed check yields Rejected under selected rules. Otherwise unresolved checks yield Unresolved. This tool never performs or authenticates an import.

Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.

Source	Filename	Bytes	SHA-256
primary	fictional-primary.json	194	42b9af1571336e4877a7378fdd46a49e5ecaaf05e1163c5e31b6eec0a2f78dff

Frozen inputs

Field	Value
Approved import schema	[{"field":"ID","type":"text","required":true}, {"field":"Amount","type":"decimal","required":true}]
Unexpected fields	Allow
Expected row count	3
Declared external checks	[{"check":"Fictional destination check","state":"Unresolved","evidence":"No live import"}]

Review result

11 source-linked review rows. Passed: 10; Unresolved: 1.

- Method revision 2026-10-08.dataset-utility.1.

- Run actual schema and row-count checks independently. Preserve external check states as customer declarations. Any failed check yields Rejected under selected rules. Otherwise unresolved checks yield Unresolved. This tool never performs or authenticates an import.

Measure	Value
Review rows	11
Passed	10
Unresolved	1

Source-linked checks

The formal report shows at most the first 100 review rows and 300 characters per displayed field. Complete values, result columns, sources and output are retained in the Excel and JSON files.

Reference	Result	Finding
2 / ID	Passed	Declared field rules passed.
3 / ID	Passed	Declared field rules passed.
4 / ID	Passed	Declared field rules passed.
2 / Amount	Passed	Declared field rules passed.
3 / Amount	Passed	Declared field rules passed.
4 / Amount	Passed	Declared field rules passed.
Start	Passed	Unexpected source field. Selected handling is Allow.
End	Passed	Unexpected source field. Selected handling is Allow.
Status	Passed	Unexpected source field. Selected handling is Allow.
Population	Passed	Expected 3 source rows.
Fictional destination check	Unresolved	Customer-declared external check. No external execution or authentication.

Unresolved items and limitations

- 1 checks remain unresolved. Inspect the complete ledger.
- Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.

Limitations

- Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.
