

COMPLIANCE WORKING RECORD

Hidden-sheet and hidden-field inspector

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Hidden-sheet and hidden-field inspector
Document reference	39-hidden-sheet-and-hidden-field-inspector
Jurisdiction	United States
Version	2026-10-08.dataset-utility.1
Status	Dataset review prepared
Prepared by	Customer prepared
Prepared on	October 8, 2026
Generated	October 8, 2026

Purpose and boundary

Inspect actual XLSX worksheet, row and column visibility and expose stored cell values in hidden locations.

Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.

Method and exact sources

Method revision 2026-10-08.dataset-utility.1.

Read saved XLSX metadata and cells without calculating formulas, executing macros or refreshing links. Inventory all worksheets and hidden row/column flags, then list every stored cell with sheet, address, exact stored value, type, formula and visibility. Unsupported objects remain outside inspection.

Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.

Frozen inputs

Review result

9 source-linked review rows. Visible: 2; Hidden: 7.

- Method revision 2026-10-08.dataset-utility.1.

- Read saved XLSX metadata and cells without calculating formulas, executing macros or refreshing links. Inventory all worksheets and hidden row/column flags, then list every stored cell with sheet, address, exact stored value, type, formula and visibility. Unsupported objects remain outside inspection.

- Charts, drawings, images, comments, custom XML, hidden defined names and application UI settings are outside this inspection. No claim that the workbook contains no other concealed material.

Measure	Value
Review rows	9
Visible	2
Hidden	7

Source-linked checks

The formal report shows at most the first 100 review rows and 300 characters per displayed field. Complete values, result columns, sources and output are retained in the Excel and JSON files.

Reference	Result	Finding
Fictional visible	Visible	Saved workbook visibility metadata.
Fictional visible / 2	Hidden	Saved workbook visibility metadata.
Fictional visible / B	Hidden	Saved workbook visibility metadata.
Fictional visible / A1	Visible	Saved cell content. No formula evaluation.
Fictional visible / B1	Hidden	Saved cell content. No formula evaluation.
Fictional visible / A2	Hidden	Saved cell content. No formula evaluation.

Reference	Result	Finding
Fictional visible / B2	Hidden	Saved cell content. No formula evaluation.
Fictional secret	Hidden	Saved workbook visibility metadata.
Fictional secret / A1	Hidden	Saved cell content. No formula evaluation.

Unresolved items and limitations

- Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.

Limitations

- Mechanical checks use customer-selected rules and exact source values. They do not authenticate records, establish a complete population, validate an identifier registry, approve an import, or determine compliance. Original files remain unchanged in this browser.
