

COMPLIANCE WORKING RECORD

Technical file index

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Technical file index
Document reference	FICTIONAL-REVIEW-1
Jurisdiction	United States
Version	fictional-v1
Status	Review has unresolved items
Prepared by	Fictional records owner
Prepared on	October 8, 2026
Rule pack	2026-10-08.evidence-control.1
Generated	October 9, 2026

Purpose and boundary

Link customer-declared technical document requirements to actual local files and identify missing documents and version gaps.

Compare each explicit requirement with linked file versions and its declared required version. Report absent or multiple candidate files and mismatched versions. Keep unassigned files visible. Do not determine regulatory applicability, technical sufficiency or certification.

Customer facts, source bytes, file metadata, approvals and declared dates stay in this browser. Mechanical findings do not authenticate provenance, approval authority, source correctness, legal applicability, redaction completeness or unrecorded events. No remote source is fetched, file is deleted or external provider is called.

Declared review scope

Fictional evidence population. Replace every fact before use.

Review findings

4 source-linked findings. Indexed 2, Version matched 1, Version gap 1.

Formal report findings display at most 100 rows and 1000 characters per field. Complete accepted inputs and findings remain in Excel and JSON.

Kind	ID	Result	Finding
Exact local file	f1	Indexed	Exact original bytes retained. Provenance remains customer-declared.
Exact local file	f2	Indexed	Exact original bytes retained. Provenance remains customer-declared.
Technical requirement	T1	Version matched	Exact file linked to declared required version. Technical sufficiency remains unverified.
Technical requirement	T2	Version gap	Actual file version declaration differs from the explicitly required version.

Unresolved items and limits

- 1 finding needs customer review. Inspect the complete ledger.
- Customer statements, authority and source correctness remain unverified.

Limitations

- Customer facts, source bytes, file metadata, approvals and declared dates stay in this browser. Mechanical findings do not authenticate provenance, approval authority, source correctness, legal applicability, redaction completeness or unrecorded events. No remote source is fetched, file is deleted or external provider is called.

Official sources

Source	Provision	Date	Link
National Institute of Standards and Technology: Secure Hash Standard	SHA-256 file and event digests detect changes relative to retained digests. They do not authenticate source facts, approval authority, event timing, a rewritten log or legal requirements.	October 8, 2026	https://csrc.nist.gov/pubs/fips/180-4/upd1/final
