

COMPLIANCE WORKING RECORD

Audit-trail export

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Audit-trail export
Document reference	FICTIONAL-REVIEW-1
Jurisdiction	United States
Version	fictional-v1
Status	Mechanical review prepared
Prepared by	Fictional records owner
Prepared on	October 8, 2026
Rule pack	2026-10-08.evidence-control.1
Generated	October 9, 2026

Purpose and boundary

Export actions actually recorded by this local workspace and separately labeled customer-entered historical actions.

Export the complete retained local event sequence with previous-event and current-event SHA-256 digests. Validate sequence continuity. Label imported customer action rows separately. Local clocks and hashes do not authenticate history, detect a rewritten chain or establish a trusted timestamp.

Customer facts, source bytes, file metadata, approvals and declared dates stay in this browser. Mechanical findings do not authenticate provenance, approval authority, source correctness, legal applicability, redaction completeness or unrecorded events. No remote source is fetched, file is deleted or external provider is called.

Declared review scope

Fictional evidence population. Replace every fact before use.

Review findings

5 source-linked findings. Indexed 2, Retained event 1, Boundary declared 1, Declaration retained 1.

Formal report findings display at most 100 rows and 1000 characters per field. Complete accepted inputs and findings remain in Excel and JSON.

Kind	ID	Result	Finding
Exact local file	f1	Indexed	Exact original bytes retained. Provenance remains customer-declared.
Exact local file	f2	Indexed	Exact original bytes retained. Provenance remains customer-declared.
Observed local workspace event	1	Retained event	Action recorded by this browser workspace. Clock, actor identity and prior unretained history remain unauthenticated.
Retained history boundary	1	Boundary declared	Retained sequence starts at event 1. Completeness outside this workspace is unknown.
Customer-declared historical action	A1	Declaration retained	Imported declaration. This workspace did not observe or authenticate this event.

Unresolved items and limits

- Customer statements, authority and source correctness remain unverified.

Limitations

- Customer facts, source bytes, file metadata, approvals and declared dates stay in this browser. Mechanical findings do not authenticate provenance, approval authority, source correctness, legal applicability, redaction completeness or unrecorded events. No remote source is fetched, file is deleted or external provider is called.

Official sources

Source	Provision	Date	Link
National Institute of Standards and Technology: Secure Hash Standard	SHA-256 file and event digests detect changes relative to retained digests. They do not authenticate source facts, approval authority, event timing, a rewritten log or legal requirements.	October 8, 2026	https://csrc.nist.gov/pubs/fips/180-4/upd1/final
