

COMPLIANCE WORKING RECORD

Redacted disclosure bundle builder

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Redacted disclosure bundle builder
Document reference	FICTIONAL-REVIEW-1
Jurisdiction	United States
Version	fictional-v1
Status	Mechanical review prepared
Prepared by	Fictional records owner
Prepared on	October 8, 2026
Rule pack	2026-10-08.evidence-control.1
Generated	October 9, 2026

Purpose and boundary

Package only explicitly approved customer-supplied disclosure copies and record their links to preserved original files.

Require distinct original and copy IDs, different bytes, a declared redaction review, named approver, approval date and purpose. Include only qualifying copies in the disclosure ZIP. Never redact automatically or certify that sensitive content has been removed.

Customer facts, source bytes, file metadata, approvals and declared dates stay in this browser. Mechanical findings do not authenticate provenance, approval authority, source correctness, legal applicability, redaction completeness or unrecorded events. No remote source is fetched, file is deleted or external provider is called.

Declared review scope

Fictional evidence population. Replace every fact before use.

Review findings

3 source-linked findings. Indexed 2, Copy approved by declaration 1.

Formal report findings display at most 100 rows and 1000 characters per field. Complete accepted inputs and findings remain in Excel and JSON.

Kind	ID	Result	Finding
Exact local file	f1	Indexed	Exact original bytes retained. Provenance remains customer-declared.
Exact local file	f2	Indexed	Exact original bytes retained. Provenance remains customer-declared.
Disclosure copy	D1	Copy approved by declaration	Only the customer-supplied approved copy is included. Redaction completeness remains unverified.

Selected exact attachments

ID	Filename	Bytes	SHA-256
f2	fictional-approved-copy.txt	66	7e84eff56d0bd18a809245740694af5bbd53d4fcd638bc23e1e19a7e33f4c965

Unresolved items and limits

- Customer statements, authority and source correctness remain unverified.

Limitations

- Customer facts, source bytes, file metadata, approvals and declared dates stay in this browser. Mechanical findings do not authenticate provenance, approval authority, source correctness, legal applicability, redaction completeness or unrecorded events. No remote source is fetched, file is deleted or external provider is called.

Official sources

Source	Provision	Date	Link
--------	-----------	------	------

Source	Provision	Date	Link
National Institute of Standards and Technology: Secure Hash Standard	SHA-256 file and event digests detect changes relative to retained digests. They do not authenticate source facts, approval authority, event timing, a rewritten log or legal requirements.	October 8, 2026	https://csrc.nist.gov/pubs/fips/180-4/upd1/final
