Purpose and boundary

Prepare customer incident messages and updates with traceable approved facts and audience scope.

Render exact customer templates using approved event facts, service impact, response, contact and update details. Separate uncertainty from confirmed facts. Reconcile the named customer audience, version, communication duties and prior message references. Every message remains a customer-reviewed draft, without external delivery.

This working pack organizes customer-supplied incident facts, original evidence, approved rule versions and recorded decisions. It does not decide legal applicability, notification duties, statutory deadlines, insurance coverage, AI seriousness, product exploitation, authenticity or sanctions clearance. No report, message, authority filing or payment is sent. Original files remain unchanged and browser-local unless explicitly saved through paid private cloud saving.

Approved scope and incident preparation method

Fictional exercise only. Two confirmed supplied events and one selected approved duty where applicable. Replace every fact, rule and source before use.
