Rule pack	2026-10-09.incident-preparation.1
Generated	October 9, 2026

Purpose and boundary

Reconcile incident reporting obligations, staged submissions and contradictory duty versions.

Bind each approved duty to its exact instrument or contract version, incident trigger and recipient. Flag conflicting supersessions, duplicate stage receipts, missing predecessor submissions and incomplete dispatch proof. Calculate only explicit approved clocks and preserve all competing duty records rather than choose a legal interpretation.

This working pack organizes customer-supplied incident facts, original evidence, approved rule versions and recorded decisions. It does not decide legal applicability, notification duties, statutory deadlines, insurance coverage, AI seriousness, product exploitation, authenticity or sanctions clearance. No report, message, authority filing or payment is sent. Original files remain unchanged and browser-local unless explicitly saved through paid private cloud saving.

Approved scope and incident preparation method

Fictional exercise only. Two confirmed supplied events and one selected approved duty where applicable. Replace every fact, rule and source before use.
