

COMPLIANCE WORKING RECORD

Allergen declaration consistency checker

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Allergen declaration consistency checker
Document reference	38-allergen-declaration-consistency-checker
Jurisdiction	United States
Version	2026-10-09.local-interchange.1
Status	Named review prepared
Prepared by	Fictional Responsible reviewer
Prepared on	October 9, 2026
Generated	October 9, 2026

Purpose and boundary

Compare approved ingredient allergen records with exact product labeling versions.

Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.

Method and exact sources

Method revision 2026-10-09.local-interchange.1.

Group exact product IDs and recipe versions. Compare ingredient-declared allergen terms with customer-approved Contains, May contain or Not declared label records. Flag missing Contains declarations, contradictory labels, unsupported recipe links and ingredient None conflicts. Additional Contains and May contain claims require separate source review. No allergen inference from ingredient names, cross-contact test or legal labeling approval occurs.

Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.

Review result

2 source-linked findings. 0 unresolved or failed findings.

- Group exact product IDs and recipe versions. Compare ingredient-declared allergen terms with customer-approved Contains, May contain or Not declared label records. Flag missing Contains declarations, contradictory labels, unsupported recipe links and ingredient None conflicts. Additional Contains and May contain claims require separate source review. No allergen inference from ingredient names, cross-contact test or legal labeling approval occurs.

- Original files are unchanged. Working artifacts are separate and withheld when their required checks fail.

Measure	Value
Original files	2
Working artifacts	0
Unresolved findings	0

Ingredient and label comparison

The first 25 working rows appear here. Each working preview is limited to 1000 characters. Complete rows and all exact source values remain in Excel and JSON.

Reference	Working result
PRODUCT1	product id PRODUCT1; recipe version 1; label version 1; allergen Milk; ingredient declared true; label declaration Contains; result Consistent

Source-linked checks

The formal report shows at most the first 100 named check rows and 400 characters per displayed field. Complete values, result columns, sources and output are retained in the Excel and JSON files.

Unresolved items and limitations

- Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.

Limitations

- Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.
