

COMPLIANCE WORKING RECORD

Consent receipt generator

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Consent receipt generator
Document reference	4-consent-receipt-generator
Jurisdiction	United States
Version	2026-10-09.local-interchange.1
Status	Named review prepared
Prepared by	Fictional Responsible reviewer
Prepared on	October 9, 2026
Generated	October 9, 2026

Purpose and boundary

Create versioned receipts of reported choices, exact notice wording and selected purposes.

Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.

Method and exact sources

Method revision 2026-10-09.local-interchange.1.

Link every receipt ID to its exact declared subject reference, controller, action timestamp, notice version and notice text. Link each purpose once to that receipt. Reject unknown receipt links, duplicate purpose choices and contradictions between Granted, Declined or Withdrawn actions and selected purposes. Freeze a SHA-256 of the exact notice wording. Produce BCT consent-receipt v1 JSON without authenticating the reported action.

Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.

Review result

3 source-linked findings. 0 unresolved or failed findings.

- Link every receipt ID to its exact declared subject reference, controller, action timestamp, notice version and notice text. Link each purpose once to that receipt. Reject unknown receipt links, duplicate purpose choices and contradictions between Granted, Declined or Withdrawn actions and selected purposes. Freeze a SHA-256 of the exact notice wording. Produce BCT consent-receipt v1 JSON without authenticating the reported action.

- Original files are unchanged. Working artifacts are separate and withheld when their required checks fail.

Measure	Value
Original files	2
Working artifacts	1
Unresolved findings	0

Receipt preparation

The first 25 working rows appear here. Each working preview is limited to 1000 characters. Complete rows and all exact source values remain in Excel and JSON.

Reference	Working result
RECEIPT1	receipt id RECEIPT1; reported action Granted; notice sha256 6f0f88ee1145477a49095e0015ccc581e2c117899ef917aa0d161f0d8f13da3d; purpose count 1

Source-linked checks

The formal report shows at most the first 100 named check rows and 400 characters per displayed field. Complete values, result columns, sources and output are retained in the Excel and JSON files.

Reference	Result	Finding
Primary / 2	Prepared	Reported choices and exact wording linked. Action and consent validity are not authenticated.

Unresolved items and limitations

- Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.

Limitations

- Working results use exact local sources and explicitly selected versions. Originals remain unchanged in this browser. No source authenticity, population completeness, vulnerability exploitability, legal applicability, license conclusion, consent validity, food safety or external submission is established.
