Purpose and boundary

Compare advertised AI capabilities, exact product versions and numeric claims with actual evaluation evidence.

Compare each supplied advertised capability with the exact evaluated product version, capability, metric, unit, population, period and benchmark. Compare claimed values using exact decimals. A comparative claim needs a supplied comparator result on the same declared benchmark. Flag evidence reviewed after publication and unsupported scope extensions. Factual matches do not establish adequate substantiation.

This workpaper checks exact customer-supplied content, criteria, evidence and decisions. It does not establish legal applicability, adequate scientific support, clear-and-conspicuous presentation, valid consent, authenticity, identity or AI generation. No live message, call, unsubscribe link or provider is executed. Original files remain unchanged and browser-local unless explicitly saved through paid private cloud saving.
