Document control and frozen case

Index exact liability caps, exclusions, indemnities, fee references and independent customer-approved scenario illustrations.

Field	Value
Case reference	CASE-FICTIONAL
Organization	Fictional Example Company
Subject	Fictional customer case
Responsible reviewer	Fictional responsible reviewer
Preparation date	October 9, 2026

Field	Value
Scope	Fictional customer-approved scope. Replace all example records before real use.
Customer policy	POLICY-FICTIONAL
Customer policy version	fictional-v1
Declared approver	Fictional approver
Declared approval date	October 2, 2026
Decision boundary	No substantive decision or external filing made.

Named method and supported scope

Use integer decimal arithmetic for fixed and fee-multiple caps and min(claim, cap) illustrations. Join exact currencies and periods, detect conflicting shared-cap definitions, preserve uncapped and unresolved terms without portfolio aggregation.

No actual liability or enforceability decision. Shared caps, claim triggers, exclusions and indemnities require qualified human interpretation. Up to 100 rows per table, 20 originals and 25,000,000 combined original bytes.

Original contents, annotations, approvals, reported events and applicability remain customer declarations. File hashes establish retained byte identity only.

No SOC assurance, live restore, actual failover, legal service, legal classification, contract negotiation, transaction approval or external communication occurs.

All accepted records remain complete. Recovery preserves original bytes and frozen results without creating fresh payment, source authentication, consent or approval authority.

Measure	Value
Indexed liability and indemnity terms	1
Illustrative scenarios	1
Portfolio exposure total	Not computed. Shared caps and legal interpretation remain unresolved.

1. Original evidence source (S1)

State. Customer verification linked

Customer-declared original identity and verification only. Content is not extracted or independently authenticated.

Field	Value
id	S1
fileId	F1
locator	Fictional section one
sourceDate	October 1, 2026
custodian	Fictional customer custodian
description	Fictional source declaration. Does not establish actual evidence.
verification	Customer verified
verifiedBy	Fictional reviewer

4. Liability and indemnity term index (TERM1)

State. Customer-extracted illustrative cap

Exact clause, exclusions, indemnities, fee references and shared-cap identity remain separate. No enforceability or actual liability decision.

Field	Value
reference	TERM1
sourceIds	["S1"]
topic	Fictional aggregate service cap
exactClause	FICTIONAL cap equals 1.5 times selected fees. No legal interpretation.
capType	Fee multiple

Recovery and original attachment boundary

The complete local ZIP includes every original file listed in the retained manifest. A structured JSON or cloud record alone preserves the descriptor and annotation, not the original file bytes. Attach matching bytes before producing a complete original-attachment pack.

Customer recovery restores neither source authentication, approval authority nor paid export access. Payment ownership is checked before each commercial export.
