COMPLIANCE WORKING RECORD

Purpose compatibility workpaper

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Purpose compatibility workpaper
Document reference	FICTIONAL-PRIVACY-1
Jurisdiction	United States
Version	1
Status	Named privacy assessment prepared
Prepared by	Fictional responsible reviewer
Prepared on	October 9, 2026
Rule pack	2026-10-09.privacy-assessment.1
Generated	October 9, 2026

Purpose and boundary

Compare an original collection purpose with a proposed secondary use using source-linked reasoning.

Present original and proposed purposes side by side. Compare collection context, relationships, expectations, affected categories, recipient and retention changes, consequences and observed safeguards. Link each proposed use to declared flow purposes and customer-approved criteria. Preserve a reasoned compatibility decision without treating related purposes or existing consent as automatic authorization.

This preparation preserves customer-selected jurisdiction, source versions, criteria, facts and substantive decisions. It does not determine legal applicability, valid consent, a legal basis, statutory deadlines, assessment sufficiency or source authenticity. No risk reduction follows automatically from a listed safeguard. Original files remain unchanged and browser-local unless explicitly saved through paid private cloud saving.

Approved scope and privacy assessment method

Fictional limited processing boundary. Requires tailoring and responsible substantive review.

Scope approval. FICTIONAL-PRIVACY-SCOPE-1

Approved method. Fictional approved privacy preparation method 1. Source. f1. Locator. Exact fictional method and criteria JSON. Approver. Fictional method approver. Approval date. 2026-01-01

Population statement. Declared complete population. Customer-declared count. 1

Original and proposed purpose compatibility workpaper scope

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts
1	Subject ID. SUB1 Jurisdictions. ["US customer-selected preparation"] Purpose. Reduce repeated support questions from known service errors Population. Fictional customer-declared selected audience only Data Categories. ["Customer-declared service contact records"] Owner. Fictional processing owner Processing Name. Fictional support-quality secondary use Original Purpose. Resolve the original customer support request Proposed Purpose. Reduce repeated support questions from known service errors Collection Context. Fictional existing direct support relationship Relationship To Original. Fictional related service improvement requiring a separate reasoned decision Individual Expectations. Fictional exact source-reviewed notice and customer context Proposed Consequences. Fictional limited support analysis with reviewed access controls New Use Condition. Fictional customer-selected approved secondary-use condition

Criteria

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts
1	Criterion ID. C1 Jurisdiction. US customer-selected preparation Instrument. Fictional approved preparation criteria Provision. Fictional Condition question 1 Rule Version. Fictional approved privacy preparation method 1 Source ID. f1 Source Locator. criteria[0] Stage. Condition Question. Fictional Condition question based on selected observations Trigger When. Yes Trigger Effect. Condition Approved By. Fictional method approver Approved On. 2026-01-01

Answers

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts
1	Answer ID. ANS1 Subject ID. SUB1 Criterion ID. C1 Answer. No Rationale. Fictional exact observation supports this supplied answer. Evidence IDs. ["E1"] Reviewer. Fictional responsible answer reviewer Reviewed On. 2026-10-09

Flows

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts
1	Flow ID. FLOW1 Subject ID. SUB1 Data Categories. ["Customer-declared service contact records"] Source. Fictional direct customer-authorized source Purpose Phase. Proposed use Purpose. Reduce repeated support questions from known service errors Recipient. Fictional restricted service team Recipient Role. Fictional internal service role Location. Customer-selected US service region Retention Rule. Fictional approved 90-day service requirement, not a statutory period Retention Source ID. f1 Retention Locator. retention Access Roles. Fictional restricted reviewer role Disclosure State. Permitted by declared condition Disclosure Evidence IDs. ["E1"]
2	Flow ID. FLOW0 Subject ID. SUB1 Data Categories. ["Customer-declared service contact records"] Source. Fictional direct customer-authorized source Purpose Phase. Original collection Purpose. Resolve the original customer support request Recipient. Fictional original customer support recipients Recipient Role. Fictional internal service role Location. Customer-selected US service region Retention Rule. Fictional original 90-day requirement Retention Source ID. f1 Retention Locator. retention Access Roles. Fictional restricted reviewer role Disclosure State. Permitted by declared condition Disclosure Evidence IDs. ["E1"]

Alternatives

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts
1	Alternative ID. ALT1 Subject ID. SUB1 Option. Fictional bounded selected processing method Objective Contribution. Meets purpose Intrusion Comparison. Equivalent intrusion Selection. Selected Reason. Fictional reviewed observations support this exact purpose contribution. Evidence IDs. ["E1"]

ID	Facts
2	Alternative ID. ALT2 Subject ID. SUB1 Option. Fictional aggregate-only alternative Objective Contribution. Partially meets purpose Intrusion Comparison. Less intrusive Selection. Rejected Reason. Fictional observed aggregate data cannot identify the recurring support failure within this selected scope. Evidence IDs. ["E1"]

Impacts

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts
1	Impact ID. IMP1 Subject ID. SUB1 Pathway. Fictional unapproved access could expose the declared service context Affected Interest. Customer-declared confidentiality and reasonable expectations Affected Population. Fictional selected audience Assessed Contexts. ["Original and proposed use","Individual expectations and consequences"] Inherent Judgment. Customer-declared material privacy consequence Residual Judgment. Customer-declared material privacy consequence Residual Rationale. No automatic decrease follows from the selected safeguard. Measure IDs. ["M1"] Evidence IDs. ["E1"] Uncertainty. Fictional limited observation set. No complete population or legal assurance. Owner. Fictional privacy impact owner

Measures

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts
1	Measure ID. M1 Subject ID. SUB1 Impact IDs. ["IMP1"] Description. Fictional restricted role and purpose-specific access control Implementation State. Implemented Test Result. Supports reported safeguard Evidence IDs. ["E1"] Tested On. 2026-10-08 Owner. Fictional safeguard owner

Decisions

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

ID	Facts

ID	Facts
1	Decision ID. D1 Subject ID. SUB1 Jurisdiction. US customer-selected preparation Benefit Reason. Fictional exact declared service benefit and source observations. Necessity Reason. Fictional selected method meets the objective. The aggregate alternative only partly meets it. Balance Reason. Fictional material privacy consequence remains explicit. Conditional review and observed access controls support the supplied decision. Impact IDs. ["IMP1"] Measure IDs. ["M1"] Decision. Proceed with conditions Conditions. Fictional owner must review the source-supported limitation before broader use. Action IDs. ["A1"] Approval By. Fictional responsible decision maker Approval Role. Fictional processing approval role Approved On. 2026-10-09 Review On. 2026-12-31 Evidence IDs. ["E1"]

Evidence

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.
