Purpose and boundary

Prepare an exact record-disposal evidence pack from authorized targets, reported methods and verification records.

Link each selected record and disposal target to an approved method version, responsible performer, actual execution and separate certificate verification. Compare target, method, report bytes, verification, custody and destination. Never treat a prepared instruction or unsigned report as verified disposal.

This customer-prepared control pack retains exact source facts, operative rules, instrument text, responsible decisions and actual execution evidence. It does not determine legal applicability, approve a transfer, authenticate consent, execute deletion, sanitize media or make a filing. Imported non-US instruments require explicit customer approval. Exact originals stay browser-local unless explicitly saved through paid private cloud saving.

Approved scope and privacy control method

Fictional exercise only. Exact selected cases, operative rules and source records. Replace every fact, rule and decision before use.

Scope approval. FICTIONAL-SCOPE-1

Approved method. Fictional privacy preparation procedure 1. Source. f1. Locator. /methodVersion. Approver. Fictional authorized preparation-method approver. Approval date. 2026-01-02T12:00:00Z
