Purpose and boundary

Prepare distinct entity, data and activity exemption arguments with exact coverage and exclusions.

Separate each claimed exemption by its operative jurisdiction, provision, rule version and scope. Prevent an activity or data exemption from silently exempting an entire entity. Preserve excluded objects, contradictory arguments and the final reviewed outcome.

This workpaper applies exact customer-selected rules to supplied facts and prepares source-linked decisions and drafts. The customer confirms jurisdiction, coverage, operative rule version, populations and approvals. It does not certify legal applicability, exemption, consent authenticity, DPO appointment, notice delivery or a permitted transaction. Exact originals stay browser-local unless explicitly saved through paid private cloud saving.

Approved scope and privacy decision method

Fictional exercise only. Exact selected cases, operative rules and source records. Replace every fact, rule and decision before use.
