

COMPLIANCE WORKING RECORD

Anonymization claim checker

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Anonymization claim checker

Jurisdiction	Customer-approved US scope
Version	1
Status	Named privacy and platform prepared
Prepared by	Fictional responsible reviewer
Prepared on	2026-10-09T18:00:00Z
Rule pack	2026-10-09.privacy-platform.1
Generated	October 9, 2026

Purpose and boundary

Challenge unsupported anonymous-data claims using actual release bytes and explicit risk assumptions.

Measure exact quasi-identifier equivalence-class sizes, singleton count and sensitive-value diversity in supplied local JSON/CSV. Compare only an approved minimum group size, inspect declared direct identifiers and retained linkage keys, and retain auxiliary-data, multiple-release and expert-review assumptions. These descriptive checks never prove anonymity or formal privacy guarantees.

This browser preparation compares actual supplied source bytes and customer-approved policy, method and jurisdiction assumptions. It does not determine legal applicability, authenticate reported tests, certify anonymity or secure redaction, or execute preference fixtures. Unsupported surfaces, missing populations and pending human decisions stay visible. No replay, scan, DROP access, remote AI or provider call occurs. Originals remain local unless explicitly saved through paid private cloud saving.

Approved scope and privacy and platform method

Fictional selected exact original sources and approved criteria only. Replace every fictional fact before use.

Scope approval. FICTIONAL-SCOPE-1

Approved method. Fictional approved privacy/platform method 1. Source. f1. Locator. /methodVersion. Approver. Fictional authorized method approver. Approval date. 2026-01-02T12:00:00Z

Population statement. Declared complete population. Customer-declared scope count. 1

Challenge unsupported anonymous-data claims using actual release bytes and explicit risk assumptions scope inputs

The first 20 exact task rows appear here. Displayed values are bounded to 1000 characters. Complete typed rows and exact values remain in Excel and JSON.

Accountable privacy and platform actions

The first 20 prepared output rows appear here. Complete rows remain in Excel and JSON.

Privacy and platform draft. CLAIM-1. Prepared for review

Complete source-supported draft text appears below and remains in Excel and JSON.

Exact release and selected model. f3. Fictional selected controlled release model

Actual supplied records. 2. Equivalence classes 1. Minimum group size 2. Singleton classes 0

Approved quasi-identifiers. ["age_band","region"]

Selected direct identifiers. []

Retained linkage key. No

Auxiliary-information assumptions. Fictional responsible expert reviewed exact plausible auxiliary-data assumptions.

Multiple-release risk. Fictional expert reviewed retained other-release and noncompositional risks.

Expert review. Reviewed. Fictional selected equivalence-class assessment only. No anonymity or privacy guarantee is asserted.

Customer claim. No anonymity claim. No anonymity certification is produced.

This browser preparation compares actual supplied source bytes and customer-approved policy, method and jurisdiction assumptions. It does not determine legal applicability, authenticate reported tests, certify anonymity or secure redaction, or execute preference fixtures. Unsupported surfaces, missing populations and pending human decisions stay visible. No replay, scan, DROP access, remote AI or provider call occurs. Originals remain local unless explicitly saved through paid private cloud saving.

Review findings

1 actual scopes. 2 named outputs. 0 unresolved findings.

The first 100 findings and 1000 characters per displayed field appear here. Complete findings remain in the data exports.

Kind	ID	Result	Finding
Original scopes source	SCOPE-1	Matched	Every exact task fact matches the original bytes.
Original releaseClaims source	CLAIM-1	Matched	Every exact task fact matches the original bytes.
