Purpose and boundary

Prepare CMMC-scoped assets, requirement evidence and unresolved deficiencies for authorized review.

Keep the customer-selected CMMC level, contract, requirement revision and asset categories explicit. Resolve CUI and security-protection assets to actual implementation and evidence. Out-of-scope assets need a reason. Conflicting levels, missing contract scope and source gaps remain unresolved. No assessment score, certification or contract eligibility is determined.

These working records compare customer-approved criteria, declared scope, actual implementation narratives and exact local evidence. They do not determine legal applicability, certification, authorization, assurance, source authenticity or completeness of an unsupplied requirement library. Original files remain unchanged in this browser unless explicitly saved through paid private cloud saving.
