Purpose and boundary

Organize documentation for an explicitly selected FedRAMP route, role and system boundary.

Require the customer to distinguish the 2026 Consolidated Rules route from legacy Rev5 documentation. Bind selected criteria, actual offering, role and impact level. Inherited capability requires the provider package and remaining customer responsibilities. Agency actions must represent agency-owned work. Produce preparation records without certification, authorization or official-template submission claims.

These working records compare customer-approved criteria, declared scope, actual implementation narratives and exact local evidence. They do not determine legal applicability, certification, authorization, assurance, source authenticity or completeness of an unsupplied requirement library. Original files remain unchanged in this browser unless explicitly saved through paid private cloud saving.
