Purpose and boundary

Prepare transaction and third-party bribery scenarios with actual controls and treatment ownership.

Link each declared business activity to third-party relationships, reported official connections, benefits and payment purposes. Record the actual scenario, vulnerability, impact, approved risk judgments, due diligence/control evidence and response. Do not infer misconduct or legal applicability from an association or geography.

Customer-approved scope, risk judgments, licensed criteria, source observations and management decisions remain explicit. This preparation does not determine legal applicability, certification, misconduct, source authenticity, population completeness or assurance. No risk reduction is inferred from a listed control. Original files remain unchanged and browser-local unless explicitly saved through paid private cloud saving.
