

COMPLIANCE WORKING RECORD

Currency and timestamp normalizer

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Currency and timestamp normalizer
Document reference	22-currency-and-timestamp-normaliser
Jurisdiction	United States
Version	2026-10-09.source-reconciliation.1
Status	Named source review prepared
Prepared by	Fictional Review owner
Prepared on	October 9, 2026
Generated	October 9, 2026

Purpose and boundary

Preserve original amounts, currency tokens and timestamps beside exact working values.

Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.

Method and exact sources

Method revision 2026-10-09.source-reconciliation.1.

Parse the selected ungrouped decimal convention with at most six fractional places. Resolve currency tokens through exact approved alias mappings or retain an already uppercase three-letter code. Convert supported RFC3339-style timestamps to UTC milliseconds. An unqualified timestamp requires the explicitly selected fixed UTC offset. Unknown offset -00:00, leap seconds, extended years and more than three fractional digits remain unresolved.

Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.

Population declaration	Selected records only
Amount decimal separator	Comma
Fixed offset for unqualified timestamps	

Review result

6 findings across supplied source populations. 0 unresolved, conflicting, missing or different findings.

- Parse the selected ungrouped decimal convention with at most six fractional places. Resolve currency tokens through exact approved alias mappings or retain an already uppercase three-letter code. Convert supported RFC3339-style timestamps to UTC milliseconds. An unqualified timestamp requires the explicitly selected fixed UTC offset. Unknown offset -00:00, leap seconds, extended years and more than three fractional digits remain unresolved.

- Complete source rows and original values remain retained. Working copies never overwrite source files.

Measure	Value
Findings	6
Retained	3
Declared	1
Normalized	2

Source-linked checks

The formal report shows at most the first 100 named check rows and 400 characters per displayed field. Complete values, result columns, sources and output are retained in the Excel and JSON files.

Reference	Result	Finding
Comparison / 2	Declared	Explicit customer currency alias. No currency-registry lookup.
Primary / 2	Normalized	Original values and exact working amount, code and UTC instant retained. No conversion between currencies.
Primary / 3	Normalized	Original values and exact working amount, code and UTC instant retained. No conversion between currencies.

Unresolved items and limitations

- Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.

Limitations

- Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.

Official sources

Source	Provision	Date	Link
RFC Editor: Common Format and MIME Type for Comma-Separated Values Files	CSV mechanics only. This source supplies no customer schema, legal requirement, matching identity, population completeness, threshold or reconciliation rule.	October 9, 2026	https://www.rfc-editor.org/rfc/rfc4180

Source	Provision	Date	Link
RFC Editor: Date and Time on the Internet Timestamps	Supports supported timestamp syntax and explicit-offset conversion only. This implementation rejects leap seconds and more than three fractional digits rather than claiming full RFC coverage. No daylight saving, legal calendar or event authenticity is inferred.	October 9, 2026	https://www.rfc-editor.org/rfc/rfc3339
