Jurisdiction	United States
Version	2026-10-09.source-reconciliation.1
Status	Named source review prepared
Prepared by	Fictional Review owner
Prepared on	October 9, 2026
Generated	October 9, 2026

Purpose and boundary

Create a deduplicated working collection while preserving every original source row.

Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.

Method and exact sources

Method revision 2026-10-09.source-reconciliation.1.

Read and hash actual local ZIP member bytes, then group exact content_sha256 digests. A single digest with conflicting byte_length or record_type stays unresolved. Identical content copies retain the earliest source position in the working copy. Blank or malformed hashes remain retained and unresolved. Original ZIP bytes and every retained file remain separately downloadable. A digest does not authenticate provenance.

Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.

Review result

6 findings across supplied source populations. 0 unresolved, conflicting, missing or different findings.

- Read and hash actual local ZIP member bytes, then group exact content_sha256 digests. A single digest with conflicting byte_length or record_type stays unresolved. Identical content copies retain the earliest source position in the working copy. Blank or malformed hashes remain retained and unresolved. Original ZIP bytes and every retained file remain separately downloadable. A digest does not authenticate provenance.

- Complete source rows and original values remain retained. Working copies never overwrite source files.

Measure	Value
Findings	6
Retained	3
Retained representative	1
Duplicate removed from working copy	1
Unique	1

Source-linked checks

The formal report shows at most the first 100 named check rows and 400 characters per displayed field. Complete values, result columns, sources and output are retained in the Excel and JSON files.

Reference	Result	Finding
Primary / 2 / ["8ed3f6ad685b959ead7022518e1af76cd816f8e8ec7ccdda1ed4018e8f2223f8"]	Retained representative	Earliest exact content copy retained. Supplied digest is not authenticated.
Primary / 3 / ["8ed3f6ad685b959ead7022518e1af76cd816f8e8ec7ccdda1ed4018e8f2223f8"]	Duplicate removed from working copy	An earlier source position represents the same declared content in the working copy.
Primary / 4 / ["f44e64e75f3948e9f73f8dfa94721c4ce8cbb4f265c4790c702b2d41cfbf2753"]	Unique	Earliest exact content copy retained. Supplied digest is not authenticated.

Unresolved items and limitations

- Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.

Limitations

- Mechanical working results use exact supplied source populations and customer-approved rules. Originals remain unchanged in this browser. No identity, legal obligation, source completeness, currency conversion, suppression consent, refund, cancellation, shipment or external operation is authenticated or performed.
