Purpose and boundary

Consolidate actual vendors, responsible owners, services, spend, data access and dependencies.

Bind each vendor version to a legal-entity identifier, service and contract. Keep annual spend grouped by its declared currency without exchange conversion. Active vendors need a review and explicit dependency/data-access descriptions. Retirement needs the actual exit record.

This register checks customer-declared records, versions, scope, dates and exact source links. It does not authenticate source authority, consent, approvals, legal applicability, eligibility or population completeness. Exact inputs and files stay in this browser unless explicitly saved through paid private cloud saving. It does not fetch, send or change external records.

Declared review scope

Fictional selected scope. Fictional customer-support hosting supplier

Named register population

Current facts and every selected version remain complete in the Excel and JSON outputs. This formal preview shows the first 20 register identities and selected task facts.
