Purpose and boundary

Record legal entities, jurisdictions, identifiers, officers and declared direct ownership.

Preserve each legal entity/version and its direct parent reference. Resolve parent references to exactly one selected entity/version, reject self-ownership and cycles, and constrain declared ownership to zero through 100 percent. Distinct parents remain separate records; this register does not determine beneficial ownership or registry accuracy.

This register checks customer-declared records, versions, scope, dates and exact source links. It does not authenticate source authority, consent, approvals, legal applicability, eligibility or population completeness. Exact inputs and files stay in this browser unless explicitly saved through paid private cloud saving. It does not fetch, send or change external records.

Declared review scope
