Purpose and boundary

Track supplier PFAS declarations, product/version coverage, test records and unresolved responses.

Join each response to the exact supplier, product/version and customer-selected substance scope. A no-PFAS declaration needs its actual declaration reference and rationale; test-backed declarations need the method, lab, test date and result reference. Unknown and contradictory responses remain unresolved without choosing a legal substance list or threshold.

This register checks customer-declared records, versions, scope, dates and exact source links. It does not authenticate source authority, consent, approvals, legal applicability, eligibility or population completeness. Exact inputs and files stay in this browser unless explicitly saved through paid private cloud saving. It does not fetch, send or change external records.

Declared review scope

Review findings

1 selected record versions, 1 current consistent records and 0 unresolved or outstanding findings.

Formal report findings display at most 100 rows and 1000 characters per field. Complete accepted task rows, selected versions, exact expected population and findings remain in Excel and JSON.

Kind	Reference	Result	Finding
Expected record	RECORD-1	Declared requirement retained	Customer-approved exact record/version/scope requirement and source bytes retained.
Named versioned record	RECORD-1	Consistent declared record	Task-specific fields, declared version, scope, dates and exact local source links are consistent. No authority or substantive correctness is authenticated.
Exact local source	f1	Linked source	Exact original bytes retained. Publisher identity, source authority and contents remain unauthenticated.
