Purpose and boundary

Track customer-confirmed essential study records, document versions, acceptance and missing items.

Bind each actual document to study, site, phase, document type and required version. Join an optional customer-approved expected population by record/version/scope. Accepted records need the actual reviewer/date and exact bytes. Missing, stale and rejected documents remain visible; no protocol or regulatory completeness is inferred.

This register checks customer-declared records, versions, scope, dates and exact source links. It does not authenticate source authority, consent, approvals, legal applicability, eligibility or population completeness. Exact inputs and files stay in this browser unless explicitly saved through paid private cloud saving. It does not fetch, send or change external records.

Declared review scope

Fictional selected scope. Customer-confirmed fictional study consent-template version 1

Named register population

Current facts and every selected version remain complete in the Excel and JSON outputs. This formal preview shows the first 20 register identities and selected task facts.
