

COMPLIANCE WORKING RECORD

Accessibility remediation tracker

Fictional sample. Requires tailoring and responsible review.

Document control

Field	Value
Document type	Accessibility remediation tracker
Document reference	FICTIONAL-accessibilityActions
Jurisdiction	United States
Version	1
Status	Consistent reported tasks
Prepared by	Fictional responsible owner
Prepared on	October 9, 2026
Rule pack	2026-10-09.workflow-ledger.1
Generated	October 9, 2026

Purpose and boundary

Link reported accessibility issues to fixes, tested versions, actual retest results and review evidence.

Bind the issue to its location, test method and affected version. A fixed state needs the actual change/version. Retesting requires the method, observation and result. A failed retest cannot close as resolved. No accessibility conformance is inferred.

This ledger records customer-supplied facts, decisions, evidence and selected requirements. It does not authenticate consent, signatures, authority, completion, legal applicability or population completeness. It does not send, file, approve, execute a provider operation or change an external system. Exact inputs and files stay in this browser unless explicitly saved through paid private cloud saving.

Declared review scope

Fictional selected population. Repair the selected form label and verify keyboard navigation

Named task population

Current facts and every reported stage snapshot remain complete in the Excel and JSON outputs. This formal preview shows the first 20 task identities and selected task facts.

Item	State	Owner	Facts
TASK-1	Closed	Fictional workflow owner	Issue reference. Issue reference. Repair the selected form label and verify keyboard navigation Location. Location. Repair the selected form label and verify keyboard navigation

Review findings

1 selected task items, 1 consistent customer-declared completions and 0 unresolved or outstanding findings.

Formal report findings display at most 100 rows and 1000 characters per field. Complete accepted task rows, stage snapshots, reported transitions, selected requirement population and findings remain in Excel and JSON.

Kind	Reference	Result	Finding
Reported task transition	EVENT-1	Sequence checked	Named transition, actor, exact offset chronology, stage facts and actual source bytes checked. The activity remains customer-reported.
Reported task transition	EVENT-2	Sequence checked	Named transition, actor, exact offset chronology, stage facts and actual source bytes checked. The activity remains customer-reported.
Reported task transition	EVENT-3	Sequence checked	Named transition, actor, exact offset chronology, stage facts and actual source bytes checked. The activity remains customer-reported.
Reported task transition	EVENT-4	Sequence checked	Named transition, actor, exact offset chronology, stage facts and actual source bytes checked. The activity remains customer-reported.
Named task item	TASK-1	Complete by declaration	The task-specific reported sequence, required stage facts and selected evidence are consistent. Completion remains customer-declared.
Exact local source	f1	Linked source	Exact original bytes retained. Source authority, identity and contents remain unauthenticated.
